DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 36-55, drawn to an aqueous cosmetic comprising a polymer with at least two amine units, devoid of vinyl amine or vinyl amide, modified with a hydrocarbon segment that is hydrophilic or hydrophobic, wherein the segment is different from sugar and devoid of sulfur, silicone, amidino and the modification with the hydrocarbon segment is not carried out by means of a bifunctional spacer group.

Group II, claim(s) 56-58, and 65-74, drawn to a method of using a cosmetic composition comprising a cosmetically acceptable medium a polymer with at least two amine units, devoid of vinyl amine or vinyl amide, modified with a hydrocarbon segment that is hydrophilic or hydrophobic, wherein the segment is devoid of sulfur, silicone, amidino groups for softening hair.

Group III, claim(s) 59-64, drawn to a method of using a cosmetic composition comprising a cosmetically acceptable medium a polymer with at least two amine units, devoid of vinyl amine or vinyl amide, modified with a hydrocarbon segment that is hydrophilic or hydrophobic, wherein the segment is devoid of sulfur, silicone, amidino groups for improved deposition homogeneity on keratinic materials.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: They are not unified by a special technical feature. In the instant case, the composition of Group I has a segment different from sugar, while those used in the process (Group II) may have segments the same as sugar. Also, the methods of using the composition (Group II vs. Group III; i.e. softening hair and improving deposition) are different.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
